

*Arabis bodiensis* Rollins (1982)BODIE HILLS ROCKCRESS**FAMILY:** *Brassicaceae*, the mustard family.**SYNONYMS:** *Arabis fernaldiana* var. *stylosa* (misapplied)**STATUS:**Heritage Program **SENSITIVE LIST**, ranks: G2 S2

USFWS/ESA: species of concern. STATE OF NEVADA: none. BLM: Special Status Species in Nevada and California. USFS: Humboldt-Toiyabe NF and Inyo NF Sensitive Species. NNNPS: watch list.

**POPULATION CENSUS (NEVADA):** 7 occurrences mapped at 1.0 km (0.6 mi) separation, OR 8 occurrences mapped at 0.16 km (0.1 mi) separation; total estimated individuals 2048, total estimated area 54.1 ha (134 ac).**TREND:** unknown.**IMPACTS AND MAJOR THREATS (NEVADA):** Mineral exploration and development, road construction and maintenance.**INVENTORY EFFORT (NEVADA):** Surveys extensive but incomplete. Most recent entered survey 1993, average year of last survey 1993. Years since last entered survey (percent of mapped records at various survey ages): 6-10 yrs: 100%.**LAND MANAGEMENT (NEVADA)** in decreasing predominance: Humboldt-Toiyabe National Forest, U. S. Bureau of Land Management, U. S. Department of Defense, private lands (?).**RANGE:** Mineral County, Nevada; also in CA. Known in Nevada from the Wassuk Range, Brawley Peaks, and Bodie Hills. Maximum Nevada range dimension 27.5 km (17.1 mi) excluding most disjunct record. Type specimen collected in Mono County, California.**ELEVATIONS RECORDED (NEVADA):** 6720-9970 feet (2048-3039 meters).**HABITAT (NEVADA):** Dry, open, rocky, high or north-facing slopes or exposed summits of granitic or rhyolitic material, on moisture-accumulating microsites in sagebrush associations within the pinyon-juniper and mountain sagebrush zones.**PHENOLOGY:** flowering early-spring. Range of most frequent survey months: June-July.**LIFE-FORM AND HABIT:** perennial herb.**DESCRIPTION:** A perennial herb, 1.5-3.5 dm tall, with white to pinkish flowers blooming April-June.**PHOTOGRAPHS:** Morefield (1994); Nevada Natural Heritage Program images web page (1998-present), slide collection (1986-present), and files.**ILLUSTRATIONS:** none known.**OTHER GENERAL REFERENCES** (listed separately): Hickman (1993), Rollins (1993).**SPECIFIC REFERENCES:**Morefield, J. D. 1994. Current knowledge and conservation status of *Arabis bodiensis* Rollins (*Brassicaceae*), Bodie Hills rockcress, in Nevada. Carson City: Nevada Natural Heritage Program, status report prepared for the U. S. Fish and Wildlife Service, Reno.Rollins, R. C. 1982. Studies on *Arabis* (*Cruciferae*) of western North America II. # NEVADA RARE PLANT ATLAS

## INDEX TO MAPS AND FACT SHEETS

(8 August 2001)

**This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, whether or not included in the current Nevada Rare Plant Atlas. Atlas fact sheets and maps are available and linked for over 80% of these taxa. PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections for further information on the sources and limitations of the data represented on the maps and fact sheets, and for general references cited only in brief in the fact sheets. Fact sheets are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. Images, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. Updated maps and fact sheets will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.**

**Map Printing and Display:** Due to storage limitations, the map images linked to this web page are not reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the **first image** that displays is **formatted for best printing results, even though** the screen display may appear degraded. **To best approximate an original printed version:** change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then **print pages 1 to 1** of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its **best display quality on your screen**, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.

	<u>Scientific Name</u>	<u>Common Name</u>	<u>Family</u>
<u>image</u>	<i>Abronia nana ssp. covillei</i>	Coville abronia	Nyctaginaceae
	<i>Agastache cusickii</i>	Cusick hyssop	Lamiaceae
	<i>Agave utahensis var. eborispina</i>	ivory-spined agave	Agavaceae
